Website:	markhagethorn.com
Languages:	- Native Dutch
	- Professional level in English
	- Conversational level in German.

EXPERIENCE

(2019 till now)   Front-end developer at Softpak BV

At Softpak I've worked on several projects. The first project was an Angular project that will replace a 20-year old Progress application. The old application had more than 2000 different pages so we needed a good base to build upon. What we made were highly re-usable components and a generator that would allow the developer to translate any old application page to the new web-based version. I was also responsible for setting up the E2E testing library and the CI/CD.

There were two more projects I've worked on at Softpak:
1) One was the ability for truck drivers to confirm their deliveries. They would scan a QR code with their mobile device, and confirm the delivery on an Angular site hosted on Firebase, it incorporated a quick way to sign a signature and submit the document.
2) The other was an Ionic app that is used by container terminals to determine and control where containers go on the premise. We used Ionic Appflow to roll out builds to different channels.

(2016 - 2019)   Front-end developer at Ticketcounter BV

At Ticketcounter we made ticketing shops for clients such as Blijdorp. During my time at Ticketcounter I've collaborated with co-workers to create a system in PHP that allows us to quickly roll out new ticketing shops to clients. After that I had direct contact with clients to add additional features they requested.

(2014 - 2016)   Front-end developer at Zeit.io GmbH

Worked with several clients to create websites using Ruby on Rails for the backend and Angular for the frontend.

(2012 till now)   Freelance web developer (zzp)

Please refer to my website for details on the projects I've worked on.

SKILLS - SOFTWARE

App: Knowledge of Angular (1 & 2), Ionic, React, Next.js, Stencil.js, Ruby on Rails.
Node.js: Express.
Build: Gulp, Webpack
Test: Cypress, Karma/Jasmine and Jest.
